

Undergraduate Students and Financial Aid

At MIT, educating the whole student means supporting academic success, fostering an inclusive community and well-being, and cultivating personal and intellectual growth. Scholarships are the foundation of this mission, extending the Institute's reach and making it possible for talented students from around the world to study here, regardless of their financial circumstances. Donor support for financial aid gives these students the access, means, security, and freedom to explore the corners and niches of the Institute that inspire them, and develop as engaged, purposeful citizens of both the MIT community and the broader world.

Class of 2028 Profile

28,232 applicants

4.5% offered admission

1,099 enrolled (85.6% yield)

50% male, **46%** female,
3% another gender identity,
